SENIOR MANAGEMENT PROFILE

DATA CENTER OPERATIONS & ENGINEERING / FACILITIES SERVICES / CONSTRUCTION MANAGEMENT
CLOUD INFRASTRUCTURE & OPERATIONS / INFRASTRUCTURE PROJECT MANAGEMENT

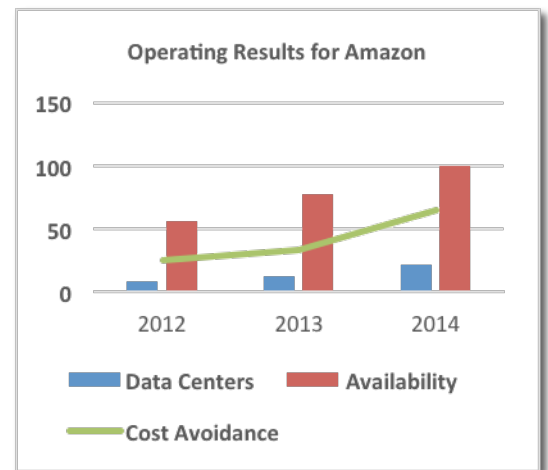

Innovating Operational Initiatives That Reduce Costs, Increase Productivity, Optimize Capacity And Exceed Customer Expectations For High-Growth, Hyper-Scale Organizations.

Pioneering, results-driven leader with high business intelligence, technical prowess and broad industry expertise. Record of proactive leadership, cutting-edge business solutions and responsive data center strategies that drive results in operational costs, service quality, system availability and efficiency for high expansion companies.

Change Management – Business Engineering – Global Operating Standards – Operational Strategy & Planning
Multi-Site Data Center Operations – Technical Resource Allocation – Project Management – Disaster Recovery
Emergency Readiness – Team Leadership & Development – Finance & Capital Budgets – Service Vendor Oversight

KEY PERFORMANCE HIGHLIGHTS & VALUE OFFERED

- Delivered **100% customer availability with zero large scale events** for 25 leased data center with \$4M+ servers—a first-of-its-kind, record-setting achievement for Amazon.
- Generated **\$30M in operational cost savings for 2 consecutive years** by employing unique in-sourcing and recruitment strategy for highly skilled laborers.
- Selected as primary engineering construction, commissioning and deployment of new **Equinix data center, 358K+ square feet facility**, the largest one of its kind.
- Was driving force behind deployment of 13 new data centers with **advanced "chillerless" technology**, a new Amazon prototype.
- Groomed top performing teams and **leadership techniques that increased employee engagement** and retention.

PROGRESSIVE TECHNICAL LEADERSHIP EXPERIENCE

ABC WEB SERVICES – provider of remote application, infrastructure and cloud computing services 2011 to present

Senior Engineering Manager, Infrastructure Operations

Leadership Scope: Play pivotal role in championing business improvement, technical, infrastructure and scalable solutions to support data center platform growth into new global regions.

- **Operations Management:** Realized dramatic results under new consolidated infrastructure operations—produced 100% customer/service availability with no large scale events paired with 15% increase in new customers.
 - Curtailed escalating labor costs for 3 consecutive years—25%, 33% and 65% in 2012, 2013 and 2014.
